

# SAVE WATER!

Be waterwise and enjoy the summer

## 48 liters

By turning off the tap for four minutes,  
while brushing your teeth,  
lathering and shaving,  
you will save 48 liters of water.

During the past year, the precipitation has been extremely low in our region and the groundwater levels has gone down to historically low levels. However the water will suffice for all if we do a bit like the camels and economize the water. Every little change you can do is valuable.
