A County of Sustainable social equal opportunities & spatial planning A society with limited climate A robust & impact & good resilient County environmental quality

Based on the Global Sustainable Development Goals (SDGs) and the challenges that we have identified in Västra Götaland, we have framed five strategic objectives. These objectives, which describe a desirable future state of the County, need to be realised step by step, in order to achieve a sustainable development. Like the SDGs, they are indivisible; all of them need to be fulfilled. To do that. our actions need be co-ordinated, comprehensive and holistic, and based on shared priorities.
